

Engility provides enterprise systems engineering, integration and analytical decision-support services to the Department of Defense, Intelligence Community and civilian agencies of the federal government. In this age of fiscal austerity and global volatility, Engility's services have never been more essential. We provide the experience, technical expertise and ingenuity to help our customers satisfy strict budget requirements without sacrificing mission readiness, mission sustainability and overall mission goals.

Military Health Specialty Care SME

Responsibilities:

- Advise clients and program management team on healthcare best practices and policy issues, development of DoD guidelines and standards, and impact of legislation and new technologies/practices on military medical specialty care and interdisciplinary healthcare.
- Provide SME consultation to senior clients (DoD, VA and HHS) using healthcare industry expertise to facilitate execution of strategic goals, taskers and inter/intra departmental initiatives related to medical specialty care and interdisciplinary medicine.
- Leverage DoD educational resources to expand collaborative model of medical education and care management.
- Create and edit briefing documents, memorandums, position papers, briefs, white papers, scholarly articles, and power point presentations on healthcare related topics appropriate for an executive-level audience and/or healthcare professionals.
- Support senior DoD leadership in collecting programmatic information and collate, integrate, and summarize inputs from subject matter experts as well as conducting the necessary background literature reviews, research, analysis and interpretation to assist with drafting, coordinating, and editing Reports to Congress, white papers, DoDI/DoDDs, memoranda, and other work products.
- Plan, schedule, organize, coordinate, and facilitate meetings, interviews, and working groups to advance client requirements, including support of strategic initiatives, interagency activities and operational priorities.

Minimum Tangible Qualifications:

- BA/BS and 5-8 years of related experience.
- 2 years of experience in military healthcare.
- Hands on experience within the DoD medicine, business processes, fiscal controls, policies, operational procedures and strategic plans.
- Strong communication, writing and consultation skills.
- Demonstrated ability to manage complex projects and work with senior policy makers, clinicians, and large working groups.
- Strong organization skills to manage multiple timelines and complete tasks quickly within the constraints of clients' timelines and budgets.

PREFERRED QUALIFICATIONS:

Successful candidates must be able to provide verifiable examples of written products that are original and primarily sole work or first authorship. Acceptable examples of such written reports are: white papers; briefing papers; journal articles (as first author published in peer reviewed literature); or, final reports on psychological health content submitted as deliverables on previous contracts.
